OfEd

Publishing and engagement infrastructure for education.

Institutions publish, teach and prove their results on an address they own — with an AI layer that turns every published chapter into practice, a readiness score, and a dashboard.

GiglyAI · Chennai, India Manikandan Muthu, Founder & CEO founder@ofed.app · ofed.app

Every institution's work lives on channels it doesn't own.

A coaching centre's WhatsApp groups are full, its Telegram channel is a wall of forwards, and YouTube hands it subscribers instead of students. Colleges have no public record of what their students produce. None of it proves what the institution is building — and none of it is theirs.

WHAT AN INSTITUTION NEEDS	TELEGRAM	WHATSAPP	YOUTUBE	OFED
Dedicated, verified profile	—	—	—	**Yes**
Student enrolment on record	—	—	—	**Yes**
Own MCQ / PYQ question bank	—	—	—	**Yes**
Student portfolios recruiters can verify	—	—	—	**Yes**
Results shown publicly, not just claimed	—	—	—	**Yes**
Direct reach — no feed algorithm	partial	partial	—	**Yes**

~4,000+ small coaching centres in Tamil Nadu's tier-2/3 districts still run on WhatsApp and PDFs.

One handle. A publishing layer, an engagement layer, and the exam engine on top.

Publish

Institutions, departments, faculty and students get permanent verified addresses — **ofed.app/handle**, also served at **handle.ofed.app**. Articles, lessons, MCQs, reels and multi-GB video live under it.

Structure

Content is authored as Books → Chapters → Sections → Concepts, so a course is machine-readable, forkable per batch, and reusable across departments.

Engage

Daily MCQ and concept feed, scheduled live tests ranked the moment they close, batch attendance and progress — direct to enrolled students, with a Telegram publishing bridge in production.

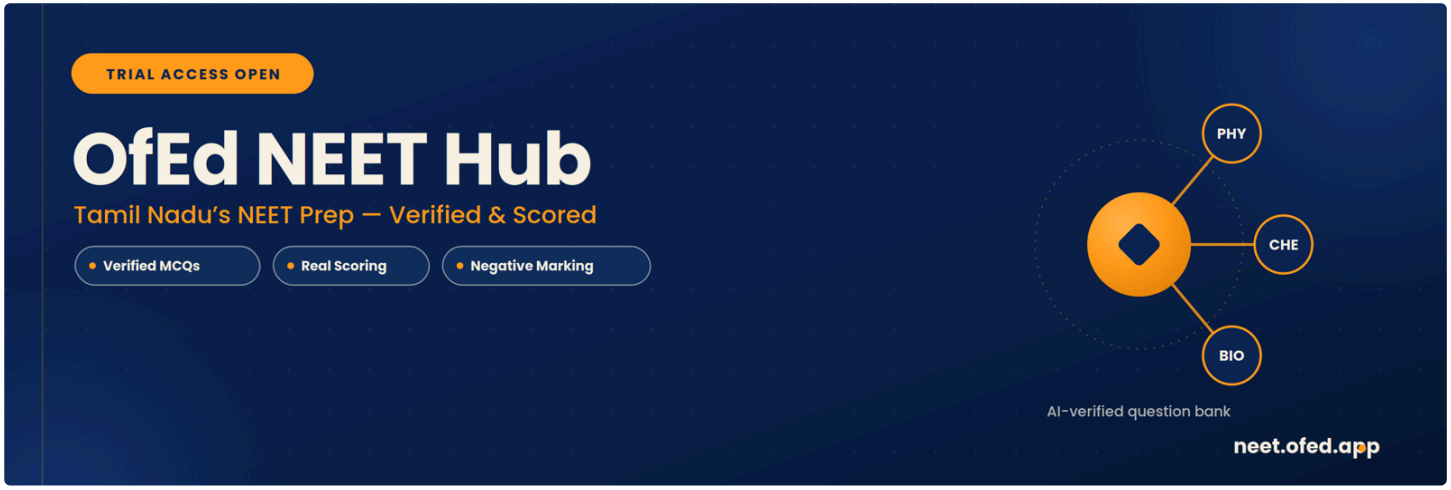

Prove

A running Examination Readiness Score per student, verified student portfolios, and a placement-cell dashboard that exports recruiter shortlists.

Live surfaces, already in students' and owners' hands.

COACHING CENTRE ACQUISITION CREATIVE

OFED NEET HUB · NEET.OFED.APP · @OFEDNEETHUB

ONBOARDING INVITE · WHATSAPP-FIRST

mcc.journalism — department profile; UG + PG students publishing

Per-city handles — ofed.app/kovaineet, /chennaineet for the free NEET Readiness Test

Branch accounts — coaching branches spun up from one parameterised template

Tamil-medium track — tamilneet.ofed.app for Tamil-medium aspirants

The content loop: publishing once produces everything downstream.

On other platforms, questions, explanations and analytics are three separate products an institution has to buy. On OfEd they are one pipeline that starts the moment a chapter is published.

STEP 01

Publish

Faculty publish a chapter, or we ingest a syllabus and past papers.

STEP 02

Generate

Practice MCQs and PYQ-aligned items generated against a concept taxonomy and known trap patterns.

STEP 03

Explain

Concept explanations for every item; per-student "My Level" personalisation is the next premium layer.

STEP 04

Score

An Examination Readiness Score out of 100, built from real attempts plus confidence analytics.

STEP 05

Report

Batch, institution and district dashboards that show who needs help before the exam, not after.

Every attempt feeds back to step 02 — item difficulty, trap efficacy and concept coverage are re-tuned from live response data.

Why the loop is a moat, not a feature.

Structured, not scraped

Content is authored into a concept taxonomy from the start, so generated items stay syllabus-accurate and traceable to a source chapter — the failure mode of generic AI quiz tools.

Owned by the institution

Each centre builds a bank tied to its syllabus and past papers. It isn't renting licensed content shared with every competitor on the platform.

Proprietary response data

Attempt-level data across NEET, JEE, TNPSC and SAT is the input no publisher has and no LLM ships with — it sharpens readiness scoring with every cohort.

Zero marginal content cost

Adding an exam is a taxonomy plus a pipeline run, not a hiring round. NEET, JEE Main, TNPSC and SAT Math were all stood up on the same machinery.

Compounding effect: more institutions publishing → more concept coverage → better generated items → sharper readiness scores → a stronger reason for the next institution to publish here rather than on WhatsApp.

Pre-revenue, with a signed institution live and a pipeline already running.

1

Signed institution, fully onboarded — MCC Journalism (UG + PG students, 5 faculty)

5

Coaching branches partnered — Jaihind Bharat Academy NEET/JEE chain

4

Exam pipelines in production — NEET, JEE Main, TNPSC, SAT Math

2

Print-ready TNPSC Group 2/2A books, ISBNs applied; NEET series next

PIPELINE	STATUS	
Madras Christian College	MoU signed Sep 2026; Journalism dept onboarded; expanding to other departments with the placement-portfolio pitch	LIVE
SRMIST Ramapuram	Viscom HoD and Dean asked for a campus-wide proposal (~29,000 students); priced proposal submitted	IN PROGRESS
TN School Education Dept	Statewide bilingual MoU proposal with the department	IN PROGRESS
Schools & NGOs	Postal campaign to CBSE/Matric schools; NEET-coaching NGOs and a free-coaching initiative in Thiruchendur onboarding	ONBOARDING
Coaching centres	Outreach to hundreds of centres across Chennai, Coimbatore, Madurai, Trichy, Puducherry, Goa, Bengaluru	ACTIVE

A recurring, exam-driven market — and we start where it's under-served.

TAM · INDIA NEET + JEE ASPIRANTS

₹1,190 Cr / year

~40 lakh registrations (22.8 L NEET UG 2026 + ~17 L JEE Main 2026) × ₹2,990 per seat-year

SAM · TAMIL NADU NEET ASPIRANTS

₹42 Cr / year

~1.4 lakh NEET 2026 candidates who appeared in Tamil Nadu × ₹2,990

SOM · FY2028-29 TARGET

₹2.9 Cr school ARR

150 schools × 65 aspirants ≈ 7% of SAM — colleges add ₹4.5 Cr ARR on top

SEGMENT	WHY IT'S OURS
Beachhead	**Schools & coaching centres in Tamil Nadu** — Class 11–12 NEET/JEE aspirants; independent institutes without their own platform.
Expansion	**Classes 6–12** in the same schools — land with NEET, expand to the full platform.
Adjacent	**Colleges**, department by department — portfolio + placement. Handle convention (mcc.journalism) scales across departments.
International	**US SAT prep** and Tamil diaspora — SAT Math already runs on the same machinery.

Context: India's test-preparation market was ~USD 11.6 B in 2025 (Ken Research). OfEd prices the institution's platform, not the coaching fee — a thin layer on a large, recurring spend.

Sources: NTA NEET UG 2026 data via Careers360; JEE Main 2026 registrations via ALLEN; TN appeared count via HelloMentor; Ken Research India Test Preparation Market 2026-2032. Seat-year = ₹299 × 10 months.

Others sell content or apps.
We give institutions the record.

CATEGORY	EXAMPLES	WHAT THE INSTITUTION GETS	WHERE OFED DIFFERS
White-label tutor apps	Classplus, Teachmint, Graphy	An app to sell and deliver its own courses; content creation is on the tutor	AI generates practice, explanations and readiness scores from what faculty publish; public verified profiles
School content & LMS	Extramarks, LEAD, school ERPs	A licensed content library rented per student; schools run it, don't own it	The school's own faculty coach on OfEd — at lower cost than outside coaching; content stays the school's
Direct-to-student brands	Physics Wallah, Aakash, ALLEN	Nothing — they compete with the institution for the same student	White-label trust model: OfEd strengthens the local institution instead of out-branding it
Free channels	WhatsApp, Telegram, YouTube	Reach, but no records, scores, enrolment or ownership	Same reach (Telegram bridge in production) plus the record they lack
Portfolio / placement tools	Generic portfolio sites, campus ERPs	Static showcase or admin records — disconnected from coursework	Portfolios built from real coursework, feeding a placement dashboard and recruiter shortlists

Our wedge: Tamil-medium and English, tier-2/3 institutions, and one platform that spans school NEET prep, college portfolios and placement — a combination no single competitor addresses.

Institution-paid seats, priced per student per month.

One class free as a pilot gets the institution moving. Revenue starts when the pilot converts and the rest of the cohort is enrolled.

STREAM	PRICING	STATUS
Schools	**₹299** per student per month + one-time setup (subdomain account, teacher and student training). Paid by the school or by parents.	PRICED
Colleges	Campus volume slabs: **₹349 / ₹299 / ₹249 / ₹199** per student per month (≤5k / ≤10k / ≤30k / 30k+). Placement dashboard included.	QUOTED
Coaching centres	Per-student platform fee on the same rails; branch accounts from one template.	NEXT
Courses & certification	AI for Journalists certificate (UNESCO-aligned); AI courses for students; AI training for teachers and faculty.	NEXT
Print	Exam-prep books from our dataset — TNPSC Group 2/2A (Tamil), NEET series (English + Tamil).	PRINT-READY
Later layers	Verified certification fees, recruiter access, premium per-student personalisation, CSR-underwritten government-school deployments via OfPeople Foundation.	YEAR 2+

One school pays back its acquisition cost in under a quarter.

PER SCHOOL · NEET COHORT (CLASS 11–12)

Paying aspirants per ~1,200-student school	**65**
Price × billable months	**₹299 × 10**
Annual recurring revenue	**₹1.94 L**
One-time setup fee	**₹25,000**
CAC (field visit, post, demo, free pilot class)	**₹40,000**
Target gross margin (cloud + content ops)	**75%**
CAC payback on gross margin	**~3 months**
3-year LTV : CAC	**~11×**

PER COLLEGE DEPARTMENT

Students per department	**100**
Slab price × months	**₹249 × 12**
Annual recurring revenue	**₹2.99 L**

Expansion is the upside: a school that converts on NEET for Classes 11–12 can roll out to Classes 6–12; a college that starts with one department expands campus-wide on the same slab. Neither needs a new sale cycle.

ASSUMPTION-BASED Pre-revenue model. Prices are as quoted to institutions; cohort size, CAC and margin are planning assumptions to be validated by the first paid cohorts.

Three doors, one platform behind them.

Institutions — direct

HoD-first for colleges; principal-first with NEET as the lead for schools; WhatsApp-first for coaching centres. Postal and email campaigns to CBSE/Matric schools and colleges, with **MCC (signed)** and **SRM (in progress)** as references. One class free as the pilot.

Students — demand pull

The free NEET Readiness Test — 20 questions, 20 minutes, one score out of 100 — runs on per-city handles (ofed.app/kovaineet, /chennaineet) with printed QRs and newspaper inserts, so institutes hear about us from their own students.

State & NGO — scale

Bilingual proposal to the TN School Education Department; NGO multipliers running free NEET/JEE coaching; CSR funding via OfPeople Foundation (CSR-1, 12A, 80G) for government-school reach at zero cost to the state.

Fallback offer that keeps doors open: institutions not ready for NEET or portfolios can start with AI courses for students and AI training for teachers — the same platform, a smaller first step.

The cost of producing exam content collapsed. The cost of trusting it went up.

Generation is cheap

What took a subject team a quarter now takes a pipeline run — which is why generic AI quiz apps flooded in, and why syllabus-accurate, source-traceable content is the scarce thing.

Institutions want proof

Parents, admissions and recruiters increasingly check claims. A verified public record beats a screenshot of a topper list.

The state is buying

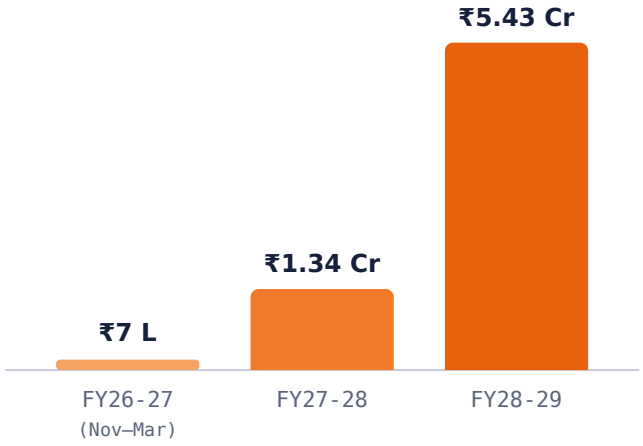

Tamil Nadu is actively funding education technology and teacher AI-fluency. Zero-cost-to-government is a fundable posture, not a discount.

The namespace is held

ofed.app, ofpeople.app, ofnews.app, ofsport.app and reelu.app sit under one entity — the publishing graph extends past education without a rebrand.

Break-even in year three on ~25,000 paying seats.

REVENUE BY FISCAL YEAR (₹, APR–MAR)

₹ LAKH	FY26-27	FY27-28	FY28-29
Paying schools (year-end)	4	40	150
Paying colleges (year-end)	1	10	30
School revenue	2.3	42.8	184.6
College revenue	0.7	71.7	298.8
Books, courses, setup	4.0	20.0	60.0
Total revenue	**7.1**	**134.5**	**543.4**
Operating cost	30.0	210.0	420.0
Net cash flow	**(22.9)**	**(75.5)**	**123.4**

Peak cumulative burn ≈ **₹98.5 L**. Exit ARR FY28-29 ≈ **₹7.4 Cr**.

PROJECTION Pre-revenue. Schools: 65 seats × ₹299 × 10 months, average active schools 22 / 95. Colleges: avg 6 × 400 seats / 20 × 500 seats at ₹249 × 12. Costs follow the hiring plan on slide 16.

What the next 24 months deliver.

Q4 2026

First revenue

MCC monetised — placement layer + AI for Journalists certificate. First paid school pilots convert. TNPSC books released.

H1 2027

Prove repeatability

10 paying schools; SRM Viscom launch; Tamil-medium NEET bank live; two-way Telegram bridge; first coaching centres paid.

H2 2027

Scale Tamil Nadu

40 schools, 10 colleges. Classes 6–10 NEET tiers. ~₹2 Cr exit ARR. Seed-round readiness.

2028

Break-even

150 schools, 30 colleges, ~25,000 seats. Government-school rollout via CSR. SAT and diaspora pilots.

Metrics we will report to investors monthly: paying seats, institutions converted from pilot, net revenue retention, CAC per institution, Readiness Score movement per cohort.

A builder-led team, shipping across the stack.

FOUNDER	**Manikandan Muthu** — Founder & CEO, Chennai. Built and shipped the OFFO platform, the AI content pipelines and the institutional outreach motion.
PARTNERSHIPS	**Sivaramakrishnan** — Director, Institutional Partnerships; Distinguished Journalist-in-Residence. Represents OfEd to institutions.
ENTITY	**GIGLY AI OPC PRIVATE LIMITED** — GST-registered. OfEd, OfPeople, OfNews, OfSport and Reelu are products of one company. Registered entities in the USA and UAE.
NON-PROFIT	**OfPeople Foundation** — registered public charitable trust (CSR-1, 12A, 80G); publisher of record for print and vehicle for CSR-funded deployments.

HIRING PLAN WITH THIS ROUND

- **2 × Institutional sales** — Tamil Nadu schools and colleges
- **1 × Full-stack engineer** — platform and integrations
- **1 × Content-ops lead** — exam pipelines and Tamil native review
- **1 × Customer success** — onboarding and teacher training

> **OfEd is the wedge** because education has the clearest buyer, the strongest proof requirement, and a live signed institution.

Raising ₹2 Cr pre-seed to turn one signed institution into a repeatable motion.

USE OF FUNDS · 24-MONTH RUNWAY

Sales & onboarding		40% · ₹80 L
Product & AI engineering		25% · ₹50 L
Content ops & Tamil review		15% · ₹30 L
Cloud infrastructure		10% · ₹20 L
Operations, legal & reserve		10% · ₹20 L

The plan needs ~₹1 Cr of the round; the rest is buffer against slower pilot conversion. Instrument: iSAFE / CCPS — open to discuss.

WHAT THIS ROUND UNLOCKS

01 **Convert the pilot** — MCC from onboarded department to paying institution, across departments.

02 **Prove paid conversion** — 40 schools and 10 colleges paying; validate per-seat price.

03 **Open the state door** — statewide MoU and a CSR-funded government-school pilot.

04 **Seed-ready** — ~₹2 Cr ARR and cohort-level outcome data for the next round.

OfEd is a publishing and engagement infrastructure trusted by Madras Christian College, Chennai.

Let's talk about building the record every institution in India can own.
